

# ClickOnce Deployment Notes

ClickOnce is a Microsoft deployment technology that installs the application with minimal user interaction. ClickOnce brings the ease of deployment of Web applications to the Windows user. In addition, ClickOnce solves three issues with conventional deployment models:

- Difficulty in updating the application: The ClickOnce deployment is hosted from a Web site. There are no files to download and manage.
- Impact of an application on the user's computer: ClickOnce-deployed applications are installed per-user, not per-machine. Each ClickOnce application is isolated from the other and cannot interfere with or overwrite other applications.
- The need for administrator permissions: No administrator privileges are required for installation because a ClickOnce-deployed application is isolated and does not affect shared components or other applications on the machine.

## Requirements

**NOTE:** The ClickOnce installer must be run by the Windows user who intends to use the software. An administrator cannot install the software for other users.

**Table 1** B2Broker Liquidity ClickOnce Deployment Requirements

<b>Internet Connectivity</b>	Required	Internet access to <a href="https://b2broker.integralsupport.com">https://b2broker.integralsupport.com</a>

**Documentation**

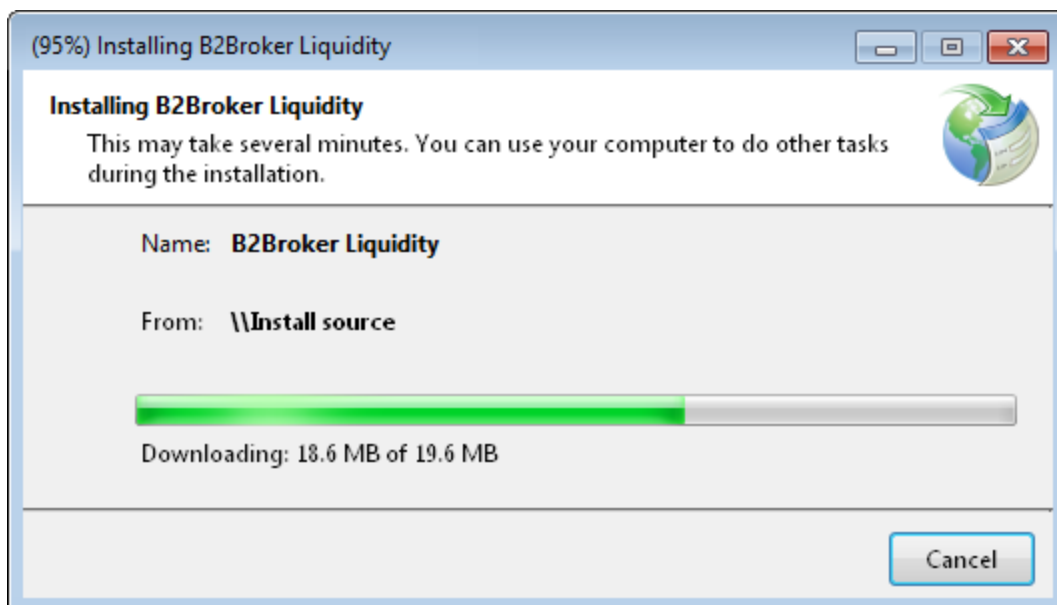

<a href="#">ClickOnce Deployment</a>	A guide to installing the ClickOnce client
<a href="#">Release Guide</a>	New features in this release
<a href="#">Trading QuickStart</a>	Concepts and features you need to start trading
<a href="#">Keypad QuickStart</a>	A guide to installing and using the keypad

4. Click the **Install/Update** button.

Your Web browser opens a window asking you to confirm the download of the `ClickOnce.exe` executable file.

5. Depending on your Web browser, choose to run the file or save the file and then run it.

The B2Broker Liquidity ClickOnce installer window opens showing the installation progress.

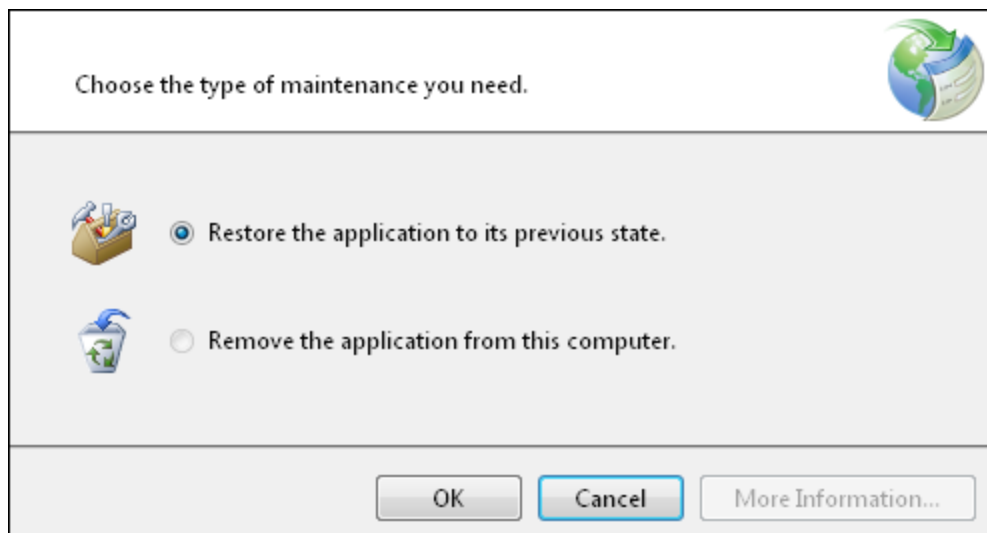

When the installation is complete, the Login window opens.

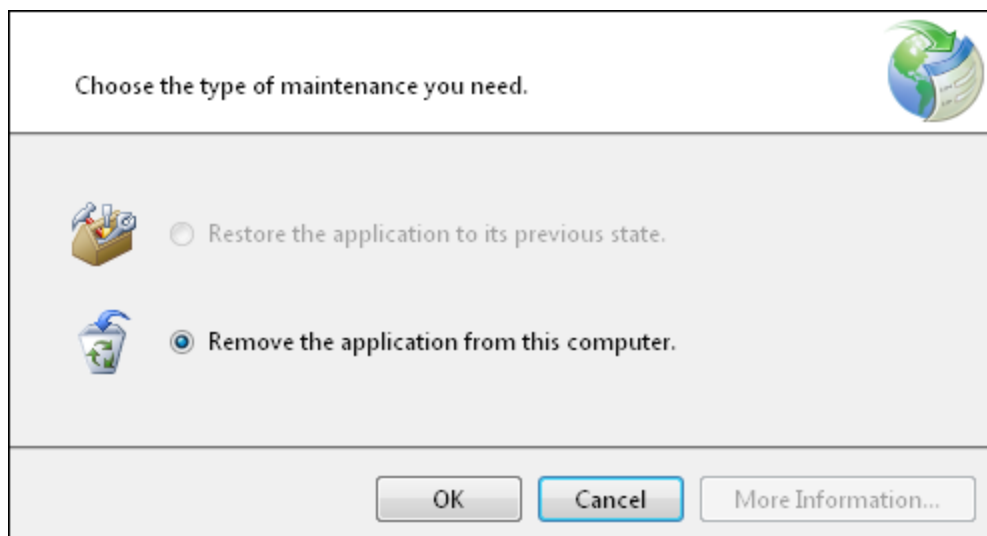

## Uninstalling B2Broker Liquidity

You uninstall B2Broker Liquidity from the Windows Control Panel. The last two versions are preserved on your workstation, giving you the option to uninstall the application completely or to restore the previous version:

If only one version is installed on your workstation and no update has occurred since the first installation, then you only have the option to remove/uninstall the application:
